**For Immediate Release:**

**Contact: Nick Holt ext. 290**

The Mammoth Community Water District (MCWD) takes pride in providing quality water and sewer services to the community of Mammoth Lakes. This construction season, the MCWD will be making water and sewer collection system improvements throughout the Town of Mammoth Lakes.

The replacement and improvement schedule for this summer includes water service lateral replacements in the Laurel Mountain Road, Red Fir Road, Majestic Pines Court, Tavern Road, Shady Rest Road, and Old Mammoth Road neighborhoods; rehabilitating and improving waste handling tanks at the wastewater treatment plant; installing a new pressure reducing vault near the intersection of Woodcrest Trail and Ranch Road; and installing a new water main near the Canyon Lodge parking lot to remove a portion of steel water main still in service.

MCWD Construction Crews have started work on the Summer 2016 Water Lateral Replacement Project. Work along Laurel Mountain Rd. between Main St. and Sierra Nevada Rd is completed. Currently, the crew is working on improvements at the wastewater treatment plant until after the 4<sup>th</sup> of July.

District crews will be working between the hours of 7:00am - 5:00pm. Please drive carefully, be alert in construction areas and use alternative routes when possible to keep our crews safe. Visit our website at [www.mcwd.dst.ca.us](http://www.mcwd.dst.ca.us) to follow the progress of our summer crews. These construction projects improve the reliability of the water and wastewater systems, improves fire safety and reduces water loss in the Town of Mammoth Lakes. If you have any questions or comments contact Nick Holt at 760-934-2596 ext. 290.
