For Immediate Release:

Contact: Nick Holt ext. 290

The Mammoth Community Water District (MCWD) takes pride in providing quality water and sewer services to the community of Mammoth Lakes. This construction season, the MCWD will be making water and sewer distribution improvements throughout the Town of Mammoth Lakes.

The replacement and improvement schedule for this summer includes water service lateral replacements in the Sierra Valley Sites and Tamarack Lane areas, connecting new pressure reducing control valves at Timberidge pump station, installing water distribution system isolation valves and replacing the remaining small sections of steel water mainlines.

MCWD Construction Crews have started work on the Summer 2015 Water Lateral Replacement Project. Currently the crews are working along Mono Street between Dorrance Drive and Meridian Blvd. Next week, the crews will also be working along Manzanita Road between Dorrance Drive and Meridian Blvd.

District crews will be working between the hours of 7:00am - 5:00pm. Please drive carefully, be alert in construction areas and use alternative routes when possible to keep our crews safe. Visit our website at www.mcwd.dst.ca.us to follow the progress of our summer crews. These construction projects improve the reliability of the water and wastewater systems, improves fire safety and reduces water loss in the Town of Mammoth Lakes. If you have any questions or comments contact Nick Holt at 760-934-2596 ext. 290.
